USER MANUAL

A Faber is forever!

Dear Customer, the following tips will be useful for you to ensure that your Faber coffee machine functions properly and is correctly maintained!

» After each dispensing, it is important to remove the pod from the special housing: if you do not do it immediately after dispensing the coffee, you risk also removing the special seal along with the now dry pod. In this case, let some water flow before removing it.

» Your Faber coffee machine's tank must be adequately filled with water: if it is not, you risk damaging the delivery pump. It is important that the inlet tube is immersed in water.

» Perform a periodic descaling!

Remember that water contains calcium and magnesium salts which, when heated, can form limescale, which are harmful to all appliances and must therefore be removed. The process for removing limescale should be repeated according to the use of the machine and the hardness of the water, approximately every 3 months. It consists of just 3 simple steps. We recommend you use our Faber Descaler and then follow the instructions on the label.

» If necessary, adjust your pod press with a simple gesture!

Should you notice water leaking near the pod when dispensing, you can adjust the brass pod press, turning it to the left and then returning it to its original position. This way you always get the best cup of coffee.

EN

WELCOME TO THE WORLD OF FABER!

This booklet will be useful for you to ensure you properly operate and correctly maintain your coffee machine.

The manual must be read carefully.

It is an integral part of the product and it is delivered together with it in case it is transferred to another user or owner.

Warranty

1) The device is guaranteed by OFI S.r.l. for a period of 12 months from the date when the first user purchased it. The proof of the purchase date is indicated on the document, which is valid for tax purposes and has been issued by the retailer. The user who wants to take advantage of the warranty must show the aforementioned document to the technical personnel who will verify its correctness.

The guarantee is only valid for Italy.

For information about any service centres abroad, contact customer support.

2) The consumer whose goods lack conformity **must contact the retailer**, who is the only person responsible towards them (under the sales contract).

3) The warranty covers replacement or repairs due to manufacturing defects or lack of conformity in the product characteristics, as declared in the accompanying documents, present at the time of purchase.

4) The warranty expressly excludes those defects that occur as a result of incorrect use, negligence or carelessness in use or storage and are caused by incorrect installation, maintenance or repair by unauthorised persons or damage during transport - **they are not attributable to manufacturing defects, but rather to normal wear and tear of the materials due to the proper use of the appliance (in particular, calcification and use of parts which wear out, such as gaskets, filter, water pump), or have been caused by lightning, humidity, fire, in-**

correct power supply voltage as well as all other damage that is not objectively attributable to the manufacturer: in particular, interventions on defects due to unsuitable use, failure to observe the instructions for operating the appliance, repairs carried out with non-original spare parts, or by unauthorised OFI S.r.l. technical personnel or circumstances which, in any case, cannot be traced back to manufacturing defects in the appliance are not covered by the Warranty. **Rust forming on the metal/iron parts is also excluded (it is advisable to always keep the machine dry) and stains on steel due to the use of aggressive detergents.**

Without prejudice to the rights that the User has towards the Retailers, their direct contractor, pursuant to Directive 1944/44/EC and its transposed decree for interventions concerning the installation, connection to feeding and drainage systems, the preparation of the appliance for the conditions of use, as well as the maintenance indicated in the instruction manual are also excluded from this Warranty. All those parts that are subject to wear and tear during normal use (such as, by way of example, removable parts, gaskets, plastics, etc.) are not covered by the Warranty.

5) OFI S.r.l. declines all responsibility for any damage that may, directly or indirectly, derive from people, things or pets due to non-compliance with all the prescriptions indicated in the specific Instruction Booklet and mainly concerning warnings about the installation, use and maintenance of the appliance.

6) Repairs carried out under Warranty do not extend or renew said Warranty.

DECLARATION OF CONFORMITY

Equipment compliant with directives 2014/30/EMC (electromagnetic compatibility directive) and 2014/151LIE (low directive and 2014/1351UL (low voltage directive)

TAKE CARE OF YOUR FABER!

Follow our directions or
go to a Service Centre

Your Faber won't turn on?

- › Check that the power socket is working.

Does the light for the thermostat that regulates the temperature (coffee dispensing light/steam dispensing light) stay on/not turn on?

- › Go to a Service Centre

Your Faber no longer dispenses coffee?

- › Check that there is water in the tank.
- › Check that the silicone tube is properly positioned in the tank.
- › Clean the shower filter. 
- › Try to descale the circuits.

Your Faber makes an unusual noise when dispensing?

- › Check that there is water in the tank.
- › Check that the rear silicone tube is correctly inserted in the appropriate tray.

Your Faber no longer draws water from the appropriate tank?

- › Check that there is water in the tank.
- › Check that the rear silicone tube is correctly positioned in the appropriate tray.
- › Check that the silicone tube is undamaged.

Your Faber is leaking from the pod press?

- › Check that the pod is correctly positioned in its housing when dispensing.
- › Check that the pod press adheres correctly to the inserted pod until it clicks shut.
- › Check that the Viton O-ring is present in the bottom part of the pod press. 

Your Faber is leaking from the top of the pod press?

- › The diffuser placed in the upper part of the pod press can loosen or wear out its gaskets from dispensing: go to a Service Centre.

Your Faber is leaking water onto the shelf?

- › Check that the drip tray is undamaged and stored correctly.

Your Faber is dispensing too quickly?

- › Always use good quality pods with a suitable weight (ESE 44 mm): a pod with poor quality/quantity ground coffee jeopardises the chance for a good cup of coffee!
- › Check that the thermostats that regulate the temperature switch on and off as usual (consult the instructions for use in this manual).
- › Adjust the brass pod press. 

Your Faber is dispensing too slowly/only dispensing small drops?

- › Check that there is water in the tank.
- › Clean the shower filter. 
- › Try to descale and clean the circuits with products that are not too aggressive, acidic or unsuitable.

Your Faber makes cold coffee?

- › Check that the thermostats work as per usual (see the instructions for use in this manual)

We remind you that all defects caused by poor maintenance and/or use of your Faber are excluded from the warranty. Remember to always periodically clean and descale your Faber. Buy our descaling and detergent products at: **faberitaliasrl.it**

Check out our useful tips on page 16.

- › See tutorials on our social channels/websit 

GENERAL SAFETY INSTRUCTIONS

Before installing your machine, take a moment to familiarise yourself with the following:

the following symbols will allow you to recognise dangerous situations, situations where you should take precautions so as not to damage the machine and provide you with the necessary information to manage it in the best possible way.

DANGER

WARNING/CAUTION

USEFUL TIPS

Do not use outdoors.

Do not use with wet hands or bare feet.

Do not expose the machine to atmospheric agents, even if it is not connected to the mains.

Do not put your hands, metal objects and anything else into the machine, even if it is not connected to the mains.

Do not allow the appliance to be used by children under the age of 8 and by people with reduced physical, sensory or mental abilities, or without prior experience or the necessary knowledge, unless they are under supervision or if they have received instructions relating to using the appliance and an understanding of the inherent dangers. Children must not play with the appliance. Cleaning and maintenance to be performed by the user must not be carried out by children without appropriate supervision.

Absolutely do not open the closing lever of the pod housing compartment during dispensing.

Before any maintenance, contact our Support Centre's specialised personnel. To find out where they are go to www.faberitaliasrl.it

Periodically check the integrity of the power cable which must only be replaced by authorised personnel.

If the power cable is damaged, it must be replaced by the manufacturer or by a servicing company or a similarly qualified person in order to avoid hazards.

Maintenance and cleaning operations must always be carried out when the machine is cooled down and disconnected from the mains.

To clean the machine use a simple damp cloth, taking care to never immerse the machine in water or put the components in the dishwasher.

Do not use solvents or aggressive chemical products.

Take care to never dry the machine or its components in the oven (of any kind).

If you find water residue inside the circuits, it is because our machines are tested one by one after assembly.

PRO TOTAL INOX / PRO DELUXE /MINI DELUXE

TECHNICAL SPECIFICATIONS

- Frame in AISI 410 stainless steel/Matte varnish
- Cup tray
- Chrome support plate
- Chrome lever
- ABS tray
- Black ABS or metal grille
- 15-bar pump
- Aluminium exchanger
- Brass cartridge and adjustable pod press
- Resistance: 500 w
- Fixed thermoregulator 95°/145° MR
- Power supply 220 v – 50 Hz
- Power supply 110 v – US kit

MINI DELUXE PET tank capacity 1 lt.

DIMENSIONS

Width 21 cm | Depth 32 cm

Height 35 cm | Weight approx. 5 kg

DIMENSIONS MINI

Width 17,5 cm | Depth 24 cm

Height 26 cm | Weight approx. 4 Kg

(1) ON/OFF switch **(2)** Temperature indicator light **(3)** Coffee dispensing switch **(4)** Pod compartment closing lever **(5)** Pod compartment filter **(6)** Drip tray **(7)** 1.3 L tank compartment lid **(8)** Delivery spout

OPERATING INSTRUCTIONS

1. Lift the lid off the water tank (7) and remove the tank
2. Fill with still water and place the tank back in its casing, ensuring that the tube is inserted to a depth of approx. 1 cm from the bottom
3. Connect the plug to a power socket and move the switch (1) to ON – Light turned on
4. Wait for the temperature indicator light (2) to turn off
5. Place the coffee pod in the slot (5)
6. Operate the lever (4) by pulling downwards until it snaps into place
7. Press the dispenser button (3) until the desired amount of coffee has been dispensed
8. Remove the pod from the slot and dispose of it

FIRST-TIME INSTALLATION

Remove the packaging and make sure that the appliance is intact. If not, contact your retailer without using it.

All the packaging elements represent SOURCES OF DANGER for children and the handicapped. The electrical system must be grounded. OFI S.r.l. cannot be held responsible for damage caused by not grounding the electrical system. Check that the technical data for the appliance is compatible with that of the electrical distribution network and your system. Do not use unapproved extension cables or adapters.

STEAM WAND

STEAM WAND OPERATING INSTRUCTIONS

1. Turn on the machine (button A) and wait for the indicator light (indicator light C – Fig. 2) to turn off: this indicates that the machine has reached the necessary temperature to dispense steam.
2. Insert the container with the liquid to be heated and press the steam dispenser button (button B – Fig. 2) until the desired temperature has been reached, then press the button again to stop dispensing steam.
3. Clean the steam wand with a damp cloth after use.

NOTA

Before performing any operations that involve dispensing steam, ensure that the steam wand is pointed in the direction of the drip tray.

Warning: Danger of scalding. Operate the steam wand using the knob.

Do not point the wand at people and/or animals.

(T1 o T3) ON/OFF switch (1) Pod compartment closing lever (2) Pod compartment filter (3) Drip tray (4) 1.3 L tank compartment lid (5) Delivery spout

POWERING ON THE APPLIANCE

Switching on appliance: Press the T1 or T3 button or T1 and T3 simultaneously to turn on the device. Press T1 and T3 simultaneously for 2 seconds to turn off the device.

WATER HEATING

The first time it is switched on, it is necessary to wait for the water to be heated before being able to proceed with coffee brewing.

All the dispensing functions are disabled and the heating phase is signaled to the user with slow flashing of the IC01 and IC03 LEDs (1 second)

As soon as the correct water temperature is reached, all functions are enabled and the machine is ready for delivery.

The machine ready phase is signaled to the user with fixed lighting of the IC01 and IC03 LEDs

INITIAL HEATING

When the machine is switched on, when the working temperature is reached, the pump is automatically turned on for 0.8 seconds to preheat the water present between the exchanger and the infuser. The function is not carried out if the exchanger heats up in less than 5 seconds (it was already hot)

Activate by default

COFFEE FUNCTION (2 timed doses programmable by the user)

Short or long coffee button (T1 - T3): momentary pressure to start-stop dispensing.

Stop automatic brewing when the preset time is reached or by pressing the coffee button during brewing.

The brewing in progress is signaled by the flashing of only the LED (IC01 or IC03) corresponding to brewing in progress.

VALUES DURATION COFFEE BREWING

	Factory Default	Programmable by user
T1 - Brewing short coffee	24 seconds	Minimum 10 sec./Maximum 75 sec.
T3 - Brewing long coffee	33 seconds	Minimum 10 sec./Maximum 75 sec.

The new duration is saved only if superior to 10 seconds.

CONFIGURATION SYSTEM

Configuration water preheating (Plug + T3 activation - T1 T3 IC01 IC03 config.)

1. Insert the plug into the socket while pressing the key T3
2. After about 1 sec. IC01 and IC03 alternately flash quickly to indicate the activation of the configuration
3. Release T3
4. IC01 flashing function disabled
5. IC02 flashing function activated
6. Press T3 to define the ON / OFF of the function, press T1 to save the setting
7. Wait for 5 seconds without pressing any buttons to exit the configuration.
8. Configuration output in "Heating"

Configuration Reset factory parameters

(activation of Plug + T1 + T3 - config. T1 T3 IC01 IC03)

1. Insert the plug into the socket while holding down the buttons T1 and T3.
2. After about 1 sec. IC01 and IC03 quickly flashes IC01 and then IC03
3. Release T1 and T3

Reset to factory parameters (Plug Activation + T1 + T3)

Our accessories

The exclusive optional for coffee pod machine Faber and our coffee pod selection make your coffee break more than comfortable.

Everything at your fingertips on www.fabercoffeemachines.com

Water softner cleaner

It contains a special resin that clean the water from impurity and limestone so you have the best quality of your coffee.

Faber Accessory holder

In plastic useful for storing pods, sugar sachets and scoops. Can be interlocked onto the top of the SLOT PLAST and INOX.

Descaler

You can take care about your Faber machine with a descaler specially made without acid and aggressive material for a perfect care of your coffee machine.

Faber cup holder

Steel, equipped with a magnet. It can be placed to the side of the machine with the metallic attraction.

Faber je zauvijek!

HR

Poštovani kupče, sljedeći vam će savjeti pomoći da vaš aparat za kavu Faber radi ispravno i da ga pravilno održavate

» Nakon svake pripreme kave važno je ukloniti dozu (cialdu) iz ležišta: ako je ne uklonite odmah, postoji rizik da se zajedno s osušenom dozom odvoji i brtva. U tom slučaju prije uklanjanja, pustite malo vode.

» Spremnik aparata mora uvijek biti dovoljno napunjen vodom: u suprotnom postoji rizik oštećenja pumpe. Važno je da je usisna cijev uronjena u vodu.

» Redovito uklanjajte kamenac (dekalcfikaciju)! Zapamtite da voda sadrži soli kalcija i magnezija koje se zagrijavanjem talože i stvaraju kamenac, štetan za sve uređaje, pa ga je potrebno ukloniti. Postupak uklanjanja kamena treba ponavljati ovisno o učestalosti uporabe i tvrdoći vode, otprilike svaka 3 mjeseca. Sastoji se od samo 3 jednostavna koraka. Preporučujemo uporabu našeg sredstva za uklanjanje kamena Faber (za dekalcfikaciju) te praćenje uputa na etiketi.

» Ako je potrebno, prilagodite držač doze jednostavnim potezom! Ako primijetite curenje vode oko doze tijekom pripreme, možete podesiti mjedeni držač doze zakretanjem ulijevo, a zatim ga vratiti u početni položaj. Tako ćete uvijek dobiti najbolju šalicu kave.

DOBRODOŠLI U FABER SVIJET!

Ova knjižica pomoći će vam da pravilno koristite i ispravno održavate svoj Faber aparat za kavu. Priručnik pažljivo pročitajte. On je sastavni dio proizvoda i mora se predati zajedno s uređajem ako ga prenosite drugom korisniku.

Jamstvo

1) Uređaj jamči OFI S.r.l. na razdoblje od 24 mjeseca od datuma kada ga je prvi korisnik kupio. Dokaz o datumu kupnje naveden je na dokumentu koji je valjan u porezne svrhe i koji je izdao prodavač. Korisnik koji želi ostvariti jamstvo mora predložiti navedeni dokument tehničkom osoblju koje će provjeriti njegovu ispravnost.

2) Potrošač koji ustanovi da proizvod nije sukladan ugovoru mora se obratiti trgovcu, koji je jedini odgovoran prema kupcu (sukladno prodajnom ugovoru).

3) Jamstvo pokriva zamjenu ili popravke zbog tvorničkih nedostataka ili nesukladnosti u karakteristikama proizvoda, kako je navedeno u priloženim dokumentima, a koje su postojale u trenutku kupnje.

4) Jamstvo izričito **ne pokriva** nedostatke nastale zbog nepravilnog korištenja, nemara ili nepažnje pri uporabi ili skladištenju, nepravilne ugradnje, održavanja ili popravaka od strane neovlaštenih osoba, oštećenja prilikom transporta. Također, ne pokriva normalno trošenje materijala uslijed pravilne uporabe uređaja (osobito nakupljanje kamenca, trošenje brtvi, filtera, pumpe za vodu), niti štetu nastalu uslijed udara groma, vlage, požara, nepravilnog napona napajanja, kao ni drugu štetu koja se objektivno ne može pripisati proizvođaču. Jamstvo ne vrijedi ni za kvarove nastale zbog nepravilnog korištenja, nepoštivanja uputa za uporabu, popravaka izvedenih s neoriginalnim rezervnim dijelovima, intervencija koje nisu obavili ovlašteni tehničari tvrtke OFI S.r.l. Jamstvo ne pokriva ni pojavu hrđe na metalnim/željeznim dijelovima (savjetuje se uvijek držati uređaj suh), mrlje na čeliku nastale ko-

rištenjem agresivnih deterdženata.

Ne dovodeći u pitanje prava koja korisnik ima prema trgovcu (sukladno Direktivi 1999/44/EZ i pratećim zakonima), iz jamstva su također isključene intervencije koje se odnose na instalaciju, priključenje na dovod i odvod, pripremu uređaja za radne uvjete, redovno održavanje navedeno u uputama za uporabu. Jamstvo ne pokriva dijelove koji su podložni trošenju tijekom normalne uporabe (npr. uklonjive dijelove, brtve, plastične elemente itd.).

5) OFI Srl odbacuje svaku odgovornost za eventualne štete koje mogu, izravno ili neizravno, nastati osobama, stvarima ili kućnim ljubimcima zbog nepoštivanja svih odredbi navedenih u priloženim Uputama za uporabu, a koje se odnose prvenstveno na upozorenja o instalaciji, uporabi i održavanju uređaja.

6) Popravci obavljeni unutar jamstva ne dovode do produljenja ili obnove samog jamstva.

IZJAVA O SUKLADNOSTI

Oprema je u skladu s direktivama 2014/30/EU (direktiva o elektromagnetskoj kompatibilnosti) i 2014/35/EU (direktiva o niskom naponu)

BRINITE SE ZA SVOJ FABER!

Slijedite naše upute ili se obratite **servisnom centru**.

Vaš Faber se ne uključuje?

- Provjerite radi li električna utičnica.

Svijetli li lampica termostata koji regulira temperaturu (lampica za kavu / lampica za paru) ili se uopće ne pali?

- Obratite se Servisnom centru.

Vaš Faber više ne dozira kavu?

- Provjerite ima li vode u spremniku.
- Provjerite je li silikonska cijev pravilno postavljena u spremnik/rezervoar.
- Očistite mrežicu tuša (tuš filter). 
- Pokušajte ukloniti kamenac iz krugova.

Vaš Faber proizvodi neobičan zvuk tijekom pripreme?

- Provjerite ima li vode u spremniku/rezervoaru.
- Provjerite je li stražnja silikonska cjevčica pravilno umetnuta u predviđenu posudicu.

Vaš Faber više ne uvlači vodu iz spremnika?

- Provjerite ima li vode u spremniku/rezervoaru.
- Provjerite je li stražnja silikonska cijev pravilno smještena u predviđenu posudicu.
- Provjerite je li silikonska cijev neoštećena.

Vaš Faber curi na području držača za doze (pod press)?

- Provjerite ima li vode u spremniku/rezervoaru.
- Provjerite je li stražnja silikonska cijev pravilno smještena u predviđenu posudicu.
- Provjerite je li silikonska cijev neoštećena. 

Vaš Faber curi s gornje strane držača za doze?

- Difuzor smješten u gornjem dijelu držača za doze može se olabaviti ili mu se mogu istrošiti brtve tijekom rada: obratite se servisnom centru.

Vaš Faber gubi vodu na pladnju za odlaganje?

- Provjerite je li posudica za skupljanje vode čitava i pravilno postavljena.

Vaš Faber prebrzo pripremu kave?

- Uvijek koristite kvalitetne doze odgovarajuće mase (ESE 44 mm): doze loše kvalitete ili premale količine mljevene kave mogu onemogućiti dobru pripremu kave!
- Provjerite pale li se i gase termostati koji reguliraju temperaturu kao i obično (pogledajte upute za uporabu u ovom priručniku).
- Podesite mesinganu prešu za doze. 

Vaš Faber ima presporu pripremu/kaplje kap po kap?

- Provjerite ima li vode u spremniku.
- Očistite mrežicu tuša (tuš-filter). 
- Pokušajte ukloniti kamenac i očistiti krugove, ali koristite proizvode koji nisu prejaki, previše kiseli ili neprikladni.

Vaš Faber priprema hladnu kavu?

- Provjerite rade li termostati ispravno (pogledajte upute za uporabu u ovom priručniku)

Podsjećamo vas da su iz jamstva isključeni svi kvarovi uzrokovani lošim održavanjem i/ili nepravilnim korištenjem vašeg aparata za kavu Faber. Zato ne zaboravite redovito provoditi čišćenje i dekalifikaciju vašeg aparata za kavu Faber. Naše proizvode za uklanjanje kamenca i čišćenje možete kupiti na: **faberitaliasrl.it**.

Pogledajte naše korisne savjete na stranici 2.

- Pogledajte video upute na našim društvenim mrežama i web stranici. 

OPĆE SIGURNOSNE UPUTE

Upoznajte se sa sljedećim simbolima koji će vam pomoći prepoznati:

opasne situacije, situacije u kojima je potrebno poduzeti mjere opreza da se uređaj ne ošteti, te korisne informacije za pravilno rukovanje uređajem.

-  Ne koristite uređaj na otvorenom.
-  Ne koristite ga mokrim rukama ili bosih nogu.
-  Ne izlažite uređaj vremenskim utjecajima, čak ni kada nije spojen na električnu mrežu.
-  Ne stavljajte ruke, metalne predmete ili bilo što drugo u unutrašnjost uređaja, čak ni kada nije spojen na električnu mrežu.
-  Uređaj ne smiju koristiti djeca mlađa od 8 godina, niti osobe sa smanjenim tjelesnim, osjetilnim ili mentalnim sposobnostima, ili bez prethodnog iskustva i potrebnog znanja, osim ako su pod nadzorom ili su dobili jasne upute o korištenju uređaja i razumijevanju mogućih opasnosti. Djeca se ne smiju igrati uređajem. Čišćenje i održavanje koje obavlja korisnik ne smije se povjeriti djeci bez odgovarajućeg nadzora.
-  Strogo je zabranjeno otvarati polugu za zatvaranje pretinca za doze tijekom pripreme napitka.
-  Prije bilo kakvog održavanja obratite se našem Servisnom centru i stručnom osoblju. Za informacije o lokacijama posjetite www.faberitaliasrl.it.

OPASNOST

UPOZORENJE / OPREZ

KORISNI SAVJETI

-  Redovito provjeravajte ispravnost kabela za napajanje koji smije mijenjati samo ovlašteno osoblje.
-  Ako je kabel za napajanje oštećen, mora ga zamijeniti proizvođač, ovlašteni servis ili druga kvalificirana osoba kako bi se izbjegle opasnosti
-  Sve radnje održavanja i čišćenja moraju se obavljati kada je uređaj isključen iz napajanja i potpuno ohlađen
-  Za čišćenje uređaja koristite jednostavnu vlažnu krpu, pazite da uređaj nikada ne uranjate u vodu niti da njegove dijelove stavljate u perilicu posuđa.
-  Ne koristite otapala ili agresivne kemijske proizvode.
-  Nikada ne sušite uređaj ili njegove dijelove u pećnici (bilo koje vrste).

Napomena: Ako unutar cijevi pronađete ostatke vode, to je zato što se naši uređaji testiraju jedan po jedan nakon sklapanja.

(1) Prekidač za uključivanje/isključivanje (ON/OFF) **(2)** Kontrolno svjetlo temperature **(3)** Prekidač za pripremu kave **(4)** Ručica za zatvaranje ležišta kapsule **(5)** Filter ležišta kapsule **(6)** Posudica za skupljanje vode **(7)** Poklopac spremnika 1,3 L **(8)** Mlaznica za izlijevanje

UPUTE ZA UPORABU

1. Podignite poklopac spremnika (7) i izvadite ga

2. Napunite ga negaziranom vodom i postavite spremnik u njegovo ležište, pazeći da umetnete cjevčicu do cca 1 cm od dna

3. Umetnite utikač u utičnicu i postavite prekidač (1) na ON – lampica se pali

4. Pričekajte da se lampica indikatora temperature (2) ugasi

5. Umetnite papirnatu dozu (ESE pod) u njezino ležište (5)

6. Spustite ručicu (4) prema dolje do klika zatvaranja

7. Pritisnite tipku za pripremu (3) do željene količine kave

8. Izvadite iskorištenu dozu iz ležišta i bacite je

PRVA INSTALACIJA

- Uklonite ambalažu i provjerite je li uređaj neoštećen; u suprotnom se obratite prodavaču i nemojte ga koristiti.
- Svi elementi ambalaže predstavljaju **OPASNOST** za djecu i osobe s invaliditetom.
- Električni sustav mora biti opremljen uzemljenjem; tvrtka OFI Srl ne može biti odgovorna za štete nastale zbog nedostatka uzemljenja električne instalacije.
- Provjerite jesu li tehnički podaci uređaja kompatibilni s podacima vaše električne mreže i instalacije.
- Ne koristiti produžne kabele ili neodobrene adaptere.

Naši dodaci

Ekskluzivni dodaci za Faber aparate na kapsule i naš izbor kapsula čine vašu pauzu još ugodnijom i praktičnijom.

Sve vam je nadohvat ruke na **fabercoffeemachines.com**

Filter za omekšavanje

Sadrži posebnu smolu koja pročišćava vodu od nečistoća i kamenca, poboljšavajući kvalitetu kave!

Držać za pribor

Plastičan, koristan za skupljanje kapsula, vrećica šećera i miješalica. Može se pričvrstiti na gornji dio modela SLOT PLAST i INOX.

Dekalcifikator

Za njegu vašeg Faber aparata, posebno razvijen dekalifikator, bez kiselih i/ili agresivnih tvari, za savršenu brigu o aparatu za kavu.

Držać za čaše

Od nehrđajućeg čelika, opremljen magnetom. Može se postaviti bočno na aparat, privučen metalnim dijelovima.

JAMSTVO PROIZVOĐAČA

1) Uređaj je pod jamstvom tvrtke OFI Srl tijekom 24 mjeseca od datuma kada ga je prvi korisnik kupio. Dokaz o datumu kupnje naveden je na dokumentu valjanom u porezne svrhe, koji izdaje prodavač i u kojem su upisani njegovi podaci. Korisnik koji želi iskoristiti konvencionalno jamstvo koje nudi OFI Srl mora predložiti navedeni dokument tehničkom osoblju koje će provjeriti njegovu valjanost.

2) Jamstvo pokriva zahvate zamjene ili popravka zbog tvorničkih nedostataka ili nesukladnosti u odnosu na

karakteristike proizvoda, kako je navedeno u pratećim dokumentima prisutnima u trenutku kupnje.

3) Jamstvo ne pokriva intervencije na nedostatke nastale nepravilnom, nemarnom ili nepažljivom uporabom, nepravilnom namjenom – posebno ne kućnom, nepoštivanjem uputa za rad uređaja, popravcima obavljenim s neoriginalnim dijelovima, radom tehničkog osoblja neovlaštenog od strane OFI Srl, ili drugim okolnostima. Ne dovodeći u pitanje prava koja Korisnik ima prema Prodavatelju, svom izravnom

JAMSTVO PROIZVOĐAČA

ugovornom partneru, u skladu s Direktivom 1944/44/EZ i njezinim provedbenim dekretom, iz ovog jamstva su također isključene intervencije koje se odnose na instalaciju, priključivanje na mreže napajanja i odvodnje, pripremu uređaja za uvjete uporabe, kao i održavanja navedena u uputama za uporabu.

Konačno, jamstvom nisu pokriveni svi oni dijelovi podložni trošenju normalnom uporabom (npr. uklonjivi dijelovi, brtve, plastika itd.).

4) OFI Srl odbacuje vsaku odgovornost za eventualne štete koje mogu, izravno ili neizravno, nastati osobama, stvarima ili kućnim ljubimcima zbog nepoštivanja svih odredbi navedenih u priloženim Uputama za uporabu, a koje se odnose prvenstveno na upozorenja o instalaciji, uporabi i održavanju uređaja.

5) Popravci obavljeni u sklopu jamstva ne dovode do produljenja ili obnove samog jamstva.
